Lab-1 PHP

1. Create a PHP script to demonstrate the use of echo with multiple parameters.

Code:

```
<?php
echo "Hello", " ", "World", "!";
?>
```

Output:

Hello World!

2. Create a PHP script to show the difference between echo and print.

Code:

```
<?php
echo "This is echo.<br>";
$result = print("This is print.<br>");
echo "Print returned: " . $result;
?>
```

Output:

This is echo.
This is print.
Print returned: 1

3. Create a PHP script to demonstrate the use of echo with multiple parameters.

Code:

```
<?php
$name = "John";
echo "Hello, my name is ", $name, ".";
?>
```

Output:

Hello, my name is John.
